

Hi Everyone,

Here are the June stats for Canadians' airplay on folkdj-1 playlists. This information has been sifted, with permission, from international lists compiled by Richard Gillmann. In June, Richard's lists were based on 13,774 airplays from 147 different DJ's.

It was pointed out to me that Jesse Winchester has returned to the U.S. What this may actually mean re his citizenship status is unknown to me. Jesse has been part of these lists from the very beginning and I'm reluctant to let him go. Let's just call him an adopted Canadian and leave it at that.

The number in brackets indicates the number of plays that album, song or artist received in the month. Cori Brewster's album "Buffalo Street" came in at #26 overall. She also took the top Canadian song spot with "Trono" at #23 and earned the hat trick, by taking top Canadian artist slot, coming in at #29 on Richard's international lists.

June: Top Canadian Albums

Richard Gillmann compiles monthly surveys of international airplay on the folkdj-l listserv. Archives of these can be found at <http://folkradio.org> Richard's complete lists can be found on his own website at <http://www.nwfolk.com> and I have used this source for the information above.

Richard created a couple of programs to analyze all playlists posted to the Folkdj-l list. These programs require that playlists be submitted in a particular format to be counted. Because of this he estimates his programs pick up 60-80% of the total airplays posted. Richard tallies the most popular albums and songs as well as total play for individual performers. As can be seen, Richard cuts off his album and artist lists at 10 plays and the songs list at 5 plays.

Richard has consented to my pulling Canadian stats from his lists for which I offer a grateful tip 'o the hat.

cheers, Vic
